Eunsu Yun

Computer Vision · On-device AI · Lightweight Deep Learning

hkhk0331@gmail.com | sillverwater.github.io | github.com/sillverwater | Seoul, South Korea

EDUCATION

Mar 2024 – Feb 2026 — **M.S. in Computer Science**, Sangmyung University — Computer Vision Lab (CCLAB) · GPA 4.5/4.5
Thesis: A Study on a Lightweight Deep Learning Model for Classifying Normal and Abnormal Vasculature in Organoid Images

Mar 2020 – Feb 2024 — **B.S.**, Sangmyung University — Convergence Electronic Engineering & Human Intelligence Information Engineering (Double Major) · GPA 4.16/4.5

PUBLICATIONS

2026 · Journal — **E. Yun**, J. Kim, D. Jeong, "Lightweight Deep Learning Model for Classification of Normal and Abnormal Vasculature in Organoid Images," *Sensors*, 26(1), 112, 2026. SCIE · first author · doi:10.3390/s26010112

2025 · Conference — "Implementation and Processing-Time Analysis of an NPU-based Real-Time Iris Recognition System," IEIE Summer Annual Conference 2025. first author · in Korean

2025 · Conference — "Hybrid Iris Recognition for Authentication Systems in AI Edge Device (NPU) Environments," ICGHIT 2025. second author · oral presenter

2023 · Conference — "A Study on Deep Learning-based Banknote Serial Number Recognition," CEIC 2023. first author · poster · in Korean

RESEARCH PROJECTS

Jun 2025 – Jan 2026 — **Lightweight Organoid Vasculature Classifier** — M.S. thesis
- Compressed EfficientNet (SiLU→ReLU, SE blocks removed); FP16 on Jetson Nano, INT8 on FuriosaAI Warboy NPU
- ~40% smaller model, 99% accuracy on NPU, 31% lower inference latency; published in *Sensors* (SCIE)

Sep 2024 – Jan 2025 — **In-Vehicle Face Recognition & Emotion Analysis** — Team Lead · industry project (DeepInsight)
- Integrated YOLOv5 face detection, HRNetV2 landmarks, ArcFace+PCA identification, EmoNet/SVM emotion on one edge device
- Face detection mAP50 0.99, identification accuracy 99%, ~40% smaller total model size

May 2024 – Aug 2024 — **Real-Time Iris Recognition on NPU** — industry project (Hyundai MIB International)
- YOLOv8s segmentation + iris-code (Hamming distance) hybrid; deployed on Jetson Nano and Mythic NPU
- Mean IoU 0.96; 47 ms (21 FPS) end-to-end on NPU; collaborated in English with an overseas technical team

Oct 2023 – Dec 2023 — **Banknote Serial Number Recognition** — undergraduate research
- Built a 12,998-image dataset (incl. Cyrillic); ResNet + BiLSTM CRNN with CTC loss; 99.15% accuracy

Mar 2022 – Jun 2022 — **Camera-based ADAS** — course project
- OpenCV lane detection + YOLOv3-tiny vehicle detection on Jetson Nano (~23 FPS); LDW and forward warning

EXPERIENCE

Mar 2024 – Feb 2026 — **Graduate Researcher**, Computer Vision Lab (CCLAB), Sangmyung University

Jun 2023 – Feb 2024 — **Undergraduate Researcher**, Computer Vision Lab (CCLAB), Sangmyung University

Apr 2024 – Dec 2024 — **Arduino Coding Club Instructor**, Sangmyung University Girls' High School

AWARDS · CERTIFICATIONS · TRAINING

Sep 2023 — Encouragement Award, Geoscience Data & AI Competition (Hackathon track), KIGAM — LSTM anomaly detection, F1 ≈ 96%

2026 — Engineer Information Processing (Sep) · SQL Developer, SQLD (Jun) · ADsP (Jun) · TOEIC Speaking IH (150)

Apr 2026 – Jun 2026 — H-Mobility Class: Autonomous Driving – Perception Track, Hyundai NGV

Sep 2022 – Dec 2022 — KT AI+X Leading Talent Program, KT · Sangmyung University

SKILLS

Languages	Python (advanced), C/C++ (intermediate), Java, SQL
AI / CV	PyTorch, TensorFlow, OpenCV, ONNX, TensorRT, scikit-learn
Edge Devices	FuriosaAI Warboy, Mythic, Kneron NPU · NVIDIA Jetson Nano/Xavier · STM32 · Arduino
Tools	Ubuntu, Git, Docker, Anaconda, MATLAB, Flask, PyQt
